

## Description:

5G-BC is battery charger exclusively used for 5G Wi-Fi wireless conference microphone units, which could charge 10 lithium batteries simultaneously. The wireless conference system mobile battery charger is design with handheld and moving wheel for rental or mobile conference system use.

## Features:

- The battery charger is exclusively designed to charge the battery 5G-BT, which is used inside the microphone.
- It is designed with portable strong protection box easy for rentable and mobile use.
- It permits up to 10 batteries simultaneously charged.
- Charging time is about 3 hours.
- Power supply of AC220V or 115V, 50-60Hz.
- Built-in over charge protection to protect the lithium battery life span.
- With charging red indicator and full green indicator.

## Specifications:

Model	5G-BC
Description	Battery Charger
Power Supply	AC220V or 115V, 50-60Hz
Power Consumption	200W
Charging Qty	10 units
Charging Current	7.2V
Charging Time	3 hours
Indicator	Red indicator flashing-charging, green indicator-full charged
Operation Temp	0°C to +40°C
Dimension	275L x 220W x 50H(mm)
Weight	10.75kg
